Office Action Summary	Application No. 10/587,260	Applicant(s) STEEN, GUNTER	
	Examiner Jesús D. Sotelo	Art Unit 3617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-8 are in the application.

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the present drawings are difficult to read and to scan. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: In the specification there are references to the term "average" (page 1, lines 8, 10; page 8, lines 20, 22). The term is not being used in its usual definition. It would appear that the term is intended to mean "collision".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the alternative language in lines 5 and 6 make this claim indefinite. Additionally, there is no proper antecedent for "the vertical inner wall members" nor for the "frame" in line 5; nor for "the horizontal stringers" in line 6. In the last two lines, it is not clear what is meant by "high breaking elongation".

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3617

7. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over McLaughlin (3,941,272).

McLaughlin discloses a double shell tank ship including an outer skin and an inner shell surrounding inner holds and wherein the outer skin and the inner shell are rigidly interconnected by substantially vertically and horizontally extending connecting elements 38, 20 and wherein the horizontal and vertical elements include perforations 50. The location of the perforations relative to the inner shell would have been an obvious matter of design choice to one having ordinary skill in the art. The mere adjustment of the location of the perforations would not produce any unexpected results.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fischer et al (5,379,711) discloses a double shell ship providing controllable crushing structure.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jesús D. Sotelo whose telephone number is 571-272-6686. The examiner can normally be reached on Mon. – Fri. 6:00 AM – 3:00 PM.
